Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claims 1-9 in the reply filed on November 1, 2004 is acknowledged. The traversal is on the ground(s) that claims 21 and 22 are not independent and distinct from claims 1-10. This is not found persuasive because the claim only functionally recites, "for a fire pump" and is considered intended use since claims 21 and 22 have acquired a separate status in the art as shown by their different classification, 417/1. However, claim 10 is closely related to claims 1-9 and will be examined.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 21 and 22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on November 1, 2004.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2 and 10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by McLoughlin '005.

Art Unit: 3752

McLoughlin '005 shows control apparatus comprising an operation control unit and condition display unit, see Figure 17.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over McLoughlin '005 in view of Springer. McLoughlin '005 shows control apparatus comprising all the featured elements of the instant invention, except for the condition display of the revolution frequency, degree of opening of a throttle and a 7-segment display unit. Springer discloses a control apparatus for a pump comprising a condition display unit 90 which displays the revolution frequency 37, degree of opening of a throttle 41/42 and is at least a 7-segment display unit, see col. 8, lines 4-14.

As to claims 6-9, the type of waves chosen FM or AM would be a matter of obvious design choice depending on which wave would work more effectively in the particular area it is operating.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nelson, Jr. shows a control apparatus for a fire pump.

Art Unit: 3752
